1. Dahiya ISAM5430 Final / A / A / Program.cs

```
namespace A_
{
    internal class Program
    {
        static void Main(string[] args)
        {
            Console.WriteLine("Enter an integer:");
            int num = Convert.ToInt32(Console.ReadLine());
            Console.WriteLine("Enter base-N");
            int n = Convert.ToInt32(Console.ReadLine());
            int temp = 0;
            int temp2 = 0;
            int sum = 0;
            int d = num / n;
            int rem, rem2;

            while (true)
            {
                if (n < 0)
                {
                    Console.WriteLine("Enter base-N (must be positive)");
                    continue;
                }
                rem = num % n;
                rem2 = d % n;
                sum = rem + rem2;
                Console.WriteLine(rem2);
            }
```

A1

int n = -1;
while (n ≤ 0){
}

What?

A2

Separate loop.

if(num<0){
num = -num;
}

(num>0)

loop

num=num/n;

A3 X

sum =sum+ rem;

A4 X

A5 Did not attempt to find the smallest.

X

            int[] count = new int[array.Length];
            for (int i = 0; i < count.Length - 1; i++)
            {
                for (int j = i + 1; j > 0; j--)
                {
                    if (count[j - 1] > count[j])
                    {
                        int temp = count[j - 1];
                        count[j - 1] = count[j];
                        count[j] = temp;
                    }
                }
            }

```

B1 all 0's

B2

B3 always false

j<=i j++

Inconsistent with Insertion Sort!

What? Swapping

B4 Bad Logic.
