3. ConsoleApp8/Program.cs
4. ConsoleApp9/Program.cs

1. **ConsoleApp6/Program.cs**

```
using System.Security.Cryptography.X509Certificates;

namespace ConsoleApp6
{
    internal class Program
    {
        static void Main(string[] args)
        {
            int[] array = {
                7,
                3,
                1,
                8,
                2,
                4,
                5,
                0,
                9
            };

            double RA = LR(array);
            Console.WriteLine(RA);

        }
        public static double LR(int[] array)
        {
            int prevsum = 0;
            int count = 0;
            double RA = 0;
            int prev = 0;
            for (int i = 0; i < array.Length; i++)
```

1. **ConsoleApp6/Program.cs**

```
            {
                count++;
                prev += array[i];
                RA = (double) prevsum / count;

                prevsum = prevsum + array[i];
            }
            return RA;
        }
    }
}
```

Should be its sum

unused.

Sum with Condition

missing a huge chunk of OK Conditions

A2

Find the average

A2b Did not Consider the first element.

2. ConsoleApp7/Program.cs

```
namespace ConsoleApp7
{
    internal class Program
    {
        static void Main(string[] args)
        {
            for (int i = 1; i < arr.Length; i++)
            {
                int value = 0;
                int next = arr[i + 1];
                if (RA < next)
                {
                    value = value + next;
                    int count2 = 1;
                    double LRA = (double)(value / count2);
                    count2++;
                    Console.WriteLine($"The larger Running Average is " +
                      LRA);
                }
            }
        }
    }
}
```

Same code

3. ConsoleApp8/Program.cs

```
namespace ConsoleApp8
{
    internal class Program
    {
        static void Main(string[] args)
        {
            int[] array = {
                7,
                3,
                1,
                8,
                4,
                5,
                0,
                9
            };

        }
    }
}
```

None.

4. ConsoleApp9/Program.cs

```
using System;

namespace ConsoleApp9
{
    internal class Program
    {
        static void Main(string[] args)
        {
            int[] array = {
                7,
                3,
                1,
                8,
                2,
                4,
                5,
                0,
                9
            };
            int prevsum = 0;
            int count = 1;
            double RA = 0;
            for (int i = 0; i < array.Length; i++)
            {
                int prev = array[i];
                RA = prevsum / count;

                Console.WriteLine(array[i] + " " + prevsum + " " + RA);
                prevsum = prevsum + array[i];
            }
        }
```

4. ConsoleApp9/Program.cs

```
    }
}
```
