1. **make-up test/make-up test/Program.cs**

```
namespace make_up_test
{
    internal class Program
    {
        static void Main(string[] args)
        {
            int[] arr = {
                5,
                6,
                7,
                8,
                9
            };
            int n = 2;
            int[] result = vd(arr, n);
            Console.Write(string.Join(",", result));
        }
        public static int[] vd(int[] array, int n)
        {
            if (n > 0 || array ≠ null || array.Length ≠ null)
            {
                return null;
            }
            int length = n * (array.Length - 1) + 1;
            int[] result = new int[length];
            int index = result.Length - 1;
            for (int i = 0; i < array.Length; i++)
            {
                result[index] = array[array.Length - i - 1];
                index--;
            }
```

B1

B2

Confused?

Copy?

B3

OK

misread [length - array.Length - i]

1. **make-up test/make-up test/Program.cs**

```
            }
            int[] prevresult = new int[length];
            int index2 = prevresult.Length - 1;
            for (int i = 0; i < result.Length; i++)
            {
                prevresult[index2] = result[result.Length - i - 1];
                index2--;
                for (int j = 0; j < result.Length; j++)
                {
                }
            }

            return prevresult;
        }

    }
}
```

B6

missing

previousresult = new int[result.Length];

array.Length

B5

B4

if(result[i] ≠ 0) {
previousresult[ ] +=
result[i] * array[ ]
result = previousresult.

Shifted index

result

array not shifted

Shifted by -1.
