1. mid 2makeup/mid 2makeup/Program.cs

1. **mid 2makeup/mid 2makeup/Program.cs**

```
using System.ComponentModel;

namespace mid_2makeup
{
    internal class Program
    {
        static void Main(string[] args)
        {

            int[] array = {
                5,
                6,
                7,
                8,
                9
            };
            int len = array.Length;
            int power = int.Parse(string.Join(" ,", Console.ReadLine()));

            int[] result = coeff(array, power);

            Console.WriteLine(string.Join(" ,", result));

        }

        static int[] coeff(int[] array, int number)
        {
            int n = number;
```

1. **mid 2makeup/mid 2makeup/Program.cs**

```
        if (number ≤ 0 && array.Length < 0)
        {

            return null;

        }

        int rlenght = n * (array.Length - 1) + 1;

        int[] newarry = new int[rlenght];
        int[] add = new int[rlenght];

        //coppy the elements from oroginal aray to new array

        for (int i = 0; i < array.Length - 1; i++)
        {

            newarry[rlenght - 1] = array[i];
            rlenght--;

        }

        for (int k = 1; k < n; k++) // it makes sure loop run
          n(power) times which is the power
```

B2

not reversel!

B3

newarry[rlenght - array.Length + i]

B6

put it in the loop

B4

1. **mid 2makeup/mid 2makeup/Program.cs**

```
        {
            for (int i = 0; i < newarry.Length; i++)
            {

                for (int j = 0; j < array.Length; j++) // taking the each elemnet from original array and multplying with all the elemets from oroginal array
                {
                    if (i - j < newarry.Length)
                    {
                        add[i] = add[i] + (array[i - j] * newarry[j]);

                    }
                }

            }

        }

        return add;

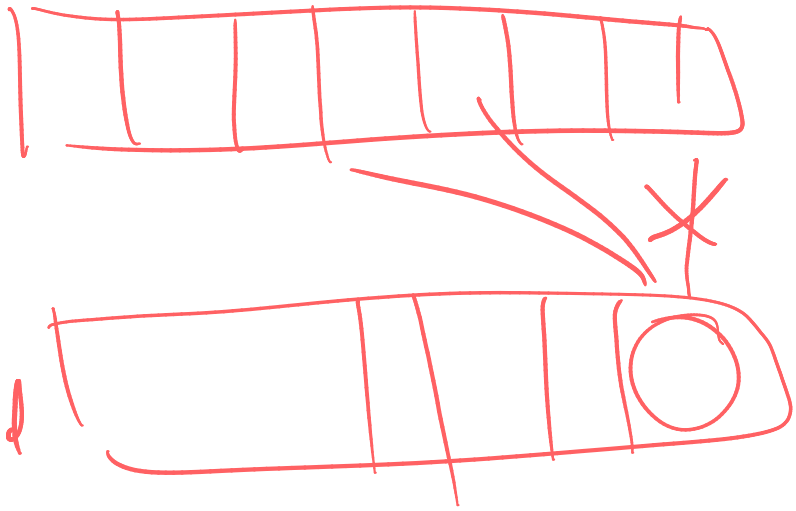
```

Using zeros : if(newarry[j] != 0) is better.

B4

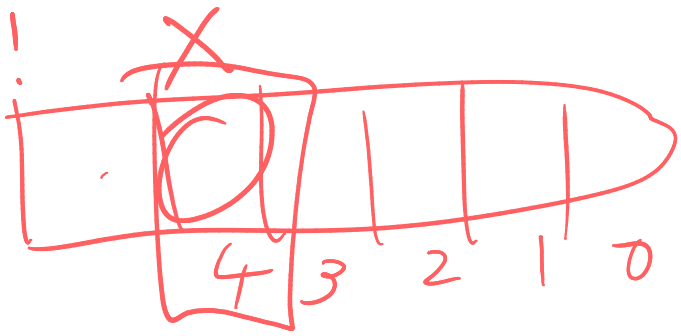
needs to be shifted:

B5 array [i - (array.Length - 1 - j)]



not shifted

shifted! by 4.



1. **mid 2makeup/mid 2makeup/Program.cs**

```
        }

    }
}
```
